

## Store Management Suite

is a complete set of applications for independent pharmacies, from single to multi-store chain environments

### the suite

For over 20 years, LOC Software has delivered solutions designed to integrate retail operations from the point of transaction to the ledger. Thousands of store owners use Store Management Suite (SMS) to serve customers, analyze data, and manage daily business in an efficient manner.

Utilizing latest technology standards, SMS is an open solution that protects your investment today and prepares your business for the future.

### the technology

The foundation of SMS is rooted in solid, proven industry standards designed to offer the protection you require and the flexibility you demand. Our system is a client to Microsoft's SQL database engine. This architecture ensures undeniable reliability, a robust feature set, and speed. Our concept of a toolbox allows the system to be personalized without changing the source code. Customization has never been easier, nor more stable. Now you too can have a solid store management system designed around your unique needs.

### everything is included

Whether you are looking for advanced promotional capabilities, or tighter integration with your dispensary system, SMS is the complete system for you. Our suite provides a cost effective, upgradeable solution capable of growing as your needs change.

Pharmacy retailers no longer need multiple systems to meet their many business needs. SMS is tailored to you, in one seamless interface that is fast and flexible, safe and easy to use.

From powerful merchandising & inventory control, fully integrated loyalty, multi-store management, and much more, SMS provides the tools.

It's time you put technology to work for you. Buy, manage, and sell better. Save time. Save money. Grow your business.
